Career Objective / Profile

AIML undergraduate student with strong academic performance and an interest in software development and problem solving. Knowledge of programming and backend technologies, with hands-on experience through academic and personal projects and a willingness to learn and build practical solutions.

Education

VNR VJIET

B.Tech – Artificial Intelligence & Machine Learning (AIML)

2025 – 2029 | **1st-Year CGPA: 9.4 / 10**

Technical Skills

- **Programming Languages:** C, Java, Python, JavaScript, SQL
 - **Backend & Web Technologies:** Node.js, Express.js
 - **Database:** MongoDB
-

Projects

- **Campus Marketplace:** Backend REST API using Node.js, Express.js, MongoDB, and Mongoose; includes CRUD operations, JWT authentication with HTTP-only cookies, bcrypt password hashing, protected routes, validation, centralized error handling, and USER/ADMIN role-based authorization.
 - **Library Management System:** Java-based system demonstrating Object-Oriented Programming concepts including inheritance, polymorphism, abstraction, and encapsulation, with management of books, students/users, librarians, and book issue operations.
 - **AI Tool Detection:** Python-based project related to detecting or identifying AI-generated content or AI tool usage.
 - **LRU Cache:** Implementation of an LRU (Least Recently Used) Cache using a HashMap and Doubly Linked List, demonstrating efficient data-structure design and constant-time cache operations.
 - **KabadiSetu:** React/TypeScript-based e-waste management platform prototype for e-waste collection and lot management, including material selection, image upload, AI-analysis workflow, weight tracking, and estimated material rates.
-

Coding Profiles

- **GitHub:** github.com/KeerthiMoosani
 - **LinkedIn:** linkedin.com/in/keerthi-moosani
 - **CodeChef:** codechef.com/users/keerthimoosani
-

Additional Information

- Strong academic performance
- Currently pursuing B.Tech in AIML
- Interested in software development, backend development, problem solving, and emerging technologies
